# SPECIAL OPERATIONS/LOW-INTENSITY CONFLICT

## OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE WASHINGTON, D.C. 20301-2500

JAN 1 2 2006

MEMORANDUM FOR UNDER SECRETARY OF DEFENSE FOR
PERSONNEL AND READINESS
UNDER SECRETARIES OF THE MILITARY
DEPARTMENTS
DIRECTOR, JOINT STAFF
CHIEF, NATIONAL GUARD BUREAU

SUBJECT: Standard Drug Testing Panel and Criteria for Reporting Drug Use in the Military Drug Testing Program

The Biological Testing Advisory Board has recommended a change to the amphetamine reporting cutoff criterion (Tab A). This change is for purposes of clarity and also for reasons related to some technical subtleties involved in the quality control support of the amphetamine confirmation analysis.

The current criterion (Tab B) requires a total amphetamine concentration of 500 ng/ml or greater and at least 20% d-isomer. The new criterion will require a confirmation cutoff of 100 ng/ml or greater d-isomer for both amphetamine and methamphetamine.

When the percentage of the l-isomer is requested by the Medical Review Officer or trial counsel the respective laboratory will forward the request to Armed Forces Institute of Pathology for further analyses.

My point of contact is Colonel Ron Shippee, USA, at telephone (703) 697-5607, and email: Ronald.Shippee@osd.mil.
